Thanks Tim,

I personally had not flagged any marine mammal projects because although they fall under education/outreach, they weren't a recreational resource impacted during the spill in Louisiana, so most of mine were focused on fisheries or projects that would benefit fisheries habitat, which may not be appropriate (and responsible for the divergence listed below). We agree on the majority of the top 30 projects.

I highlighted the projects I had flagged in green.

I had a few that you did not have:

12306 – gulf coast restaurants website  
12134 – blueprint for restoring gulf fisheries  
11973 – dock and seawall reef ball habitat  
11703 – final fridayze, restoration festivals for youth impacted by tragedy  
11618 – reef fish restoration  
11604 – field of dreams – terrebone sporting complex  
11419 - gulf of mexico hatchery and fisheries restoration consortium  
8113 – operating costs for hopedale oyster reef and fishing grounds restoration center  
5052 – GOM marine

Certainly welcome any discussion on this!

Thanks for quick turnaround

Annie

**Subject:** RE: LDWF Project Evaluation Documents

Also as discussed, attached is an evaluation of potentially relevant project submittals from the fed portal. I have sorted these so that the most relevant (approx. 32, not in any particular order) are listed first. I have also added new Columns E-G that help explain. Appreciate folks thoughts on this.

**Subject:** LDWF Project Evaluation Documents

Please see the attached documents related to LDWF screening/evaluation as discussed in this morning's meeting.

Thanks,  
Annie
